

The Little Things That Matter

a horse clinic to benefit

- What separates a well-broke horse from one just “green-broke for an experienced rider”?
- What are some tools that I can use to assess the experience level of a horse I have just met, whether it is a rescue horse, a potential purchase, or an animal I am starting to ride in lessons?
- How do I know if my horse is truly listening to me or if he is just going through the motions, and how do I regain attention and control?
- How can I get my message across to my horse in a way that will leave us with a mutual understanding, and improved behavior?
